

MNTB SAFE ENTRY INTO ENCLOSED SPACES

The basis to safety in enclosed spaces is the knowledge of safe entry procedures. This one day course covers entering and working safely within an enclosed space, utilising risk assessments, action plans and permits to work. In addition, it includes monitoring/entry equipment, emergency escape breathing devices (EEBDs), personal protective equipment (PPE) and dealing with an emergency situation. This course can be divided into two parts for on-board training if required.

Competence assessment can be undertaken at an accredited centre which would result in MNTB recognition.

KEY FACTS

- Duration - 1 day
- Assessment - written and practical
- Instructor/candidate ratio - 1:10
- Award alignment - aligns with Working in Medium Risk Confined Spaces 6150-02
- Accreditation - MNTB Recognition
- Lifespan - 3 years
